# The Source for Java Technology

The Java 2 Platform provides robust end-to-end solutions for networked applications as well as a trusted standard for embedded applications. It includes three editions:

Enterprise Edition  
J2EE

Standard Edition  
J2SE

Micro Edition  
J2ME

**Don't miss JavaOne 2003!** Here is a sampling of some of the more intriguing destinations for enterprise developers at this year's JavaOne conference.

## Highlights

May 1, 2003

### **Growing a Language: A Conversation with Guy Steele**

Sun Fellow, Guy Steele, talks about the Java programming language and how -- and how not -- to grow software.

**A Conversation with Guy Steele**

April 29, 2003

### **JAX-RPC on the Sun ONE Web Services Platform Developer Edition, Part 1**

This first part of a two-part article gives an overview of JAX-RPC, and describes how to use the API with two components of the Sun ONE Web Services Platform Developer Edition.

April 24, 2003

### **The Socket API in JXTA 2.0**

Follow a step-by-step code example to learn about the new socket API in JXTA 2.0.
